Respected Sir/Madam,

Indian Water Works Association (IWWA), is a voluntary body of professionals concerned and connected with water supply for municipal, industrial, agricultural uses and treatment & disposal of wastewater. IWWA focuses on the entire "Water Cycle" encompassing the environmental, social, institutional and financing issues. Founded in 1968 with headquarters at Mumbai, IWWA now has 36 Centres spread across the country and is very active in conducting different activities in the areas of Water Supply and Waste water Treatment and Disposal. IWWA has a membership of more than 12000 professionals, spread all over the country and abroad. It has a wide spectrum of qualified and reputed members who are the decision makers in Water & Waste Water Sector, the policy implementing Engineers & Scientists, the beneficiary & contributing organizations of the Sector, Research & Development Organization & the supporting manufacturer and supplier of the Sector.

The Objective of IWWA is to stimulate and promote the development of Science, Technology, Economics, Environment, Ecology and Social Sciences in managing the Water; both fresh and waste water. It provides a common platform for the persons and organizations working in this sector to exchange views, share ideas, disseminate information and knowledge about new and appropriate technologies for improving and upgrading the services.

At the International level, it has relations with other similar Associations such as: International Water Association (IWA), American Water Works Association (AWWA), Global Water Partnership (GWP), and Japan Water Works Association (JWWA).

55th Annual Convention of IWWA:

Water supply and sanitation in India continue to be inadequate, despite longstanding efforts by the various levels of government and communities, at improving coverage. The level of investment in water and sanitation, albeit low, by international standards, has also increased during the 2000's in India. Access to water and sanitation has also increased significantly. At the same time, local governments, institutions in charge of operation and maintaining the infrastructure, are now focusing more to overcome the financial sustainability, to carry out their functions. Beside the thrust is on to have a continuous water supply and conservation and reuse of water.

The ever-increasing use of water and especially looking to the recent declaration by UN, being water as: "Fundamental Human Right", IWWA have therefore chosen the 2023 annual convention theme as:

"Sustainable Management of Water & Sanitation – Availability for all"

IWWA organizes annual conventions across the country normally at one of its centre places.

These conventions turn out to be very lively; and important events are conducted in the Convention, attracting a large number of professionals from all over the country and also from World over. The conventions provide a very good platform for its members as also for academicians, industrialist to exchange their views. The convention brings in expertise from all the areas for the water sector.

The 55th IWWA Annual Convention will be held at Pune on January 20th, 21st, & 22nd 2023. The convention has a three days programme and has a conference and parallel workshop and an exhibition. Convention will provide the Platform to share the knowledge & experience, to have better water management in future. Engineers, Scientist, Manufacturer, Consultants, Users, NGO and Government officers are invited to actively participate in the Technical Sessions. The last 54 conventions have

witnessed overwhelming response from presenters, delegates and exhibitors, with an average attendance of more than 800 delegates.

The technical session of the convention includes presentation of papers based on themes:

Water to every household - challenges. (Har Ghar Jal),

24x7 Water Supply Systems

Urban & Rural, Wastewater Management in Urban & Rural Areas,

Faecal Sludge and Septage Management,

Operation & Maintenance of Water and Wastewater Systems,

Resilient Water and Wastewater Systems,

Circular Economy for water,

Climate Change and Water,

Water Resource Management etc.

Lots of Innovative work in water and allied fields have been done by you. We request you to encourage your students and colleagues to participate and publish papers in the 55th IWWA Annual Convention 2023. Your experience and knowledge will definitely give new insights and perspectives to the authors present in the convention. We are also planning to publish selected papers in Springer or Scopus index journal. The 55th IWWA Annual Convention brochure is attached herewith.
