Madam,

At the outset let me express our sincere thanks for supporting the training program initiated by the DST for students from North East States & UT of J K & Ladakh by sending a first batch of six students to our Institute from your University. I also thank Prof. Aijaz Ahmad of dept. of chemistry for the same. Our director, Prof. Sanjay Behari has recently met you and he told me that you have expressed your keen interest in this program. Thank you for the same.

I am herewith informing you that we are accepting one more batch of students for another session starting on January 1st. I seek your active support to find suitable and deserving students for providing training under this scheme and request you to nominate few students from Kashmir and also request you to circulate the brochure among the faculty and students of the departments of your university and to other institutes of your state who will be really deriving and interested. If you can facilitate publicizing this program and nominate/motivate students, it will be beneficial for them. The feed back from the first batch of students are very good and I wish more students will avail this opportunity.

Brief note about the program, This is a GOI-DST initiative under which a research exposure-observer-training programme for students from North East States and Union Territories of Jammu Kashmir and Ladakh through various Academic and Research institutions across India are provided. Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST) Thiruvananthapuram, Kerala has been selected by the DST as one of the centres for the implementation of this scheme. This is a very exciting opportunity for interested students to have exposure to all the fields as given in the brochure. The term is for three months. Students pursuing post graduation course in Science & Technology streams, have appeared for post graduate final examination in the current year or passed post graduation course in the previous year are eligible. The students will be paid a stipend of Rs.5000/- per month in addition to the expenses including their travel and accommodation met under the scheme. Students with Chemistry, Physics, Biotechnology, life science, biochemistry, MTech etc who are interested to pursue biomedical research or medical device development will find it useful. Please see the attached brochure for details.

We hope that this scheme will benefit many students to get an exposure to biomedical sciences and research including biomedical device development and clinical views and thus will be able to attract the interest of more students to these fields, with your support. Please support for the successful implementation of the program. Please feel free to contact me if you or the students need any more clarification.

I am also requesting you to publicise about our PhD program and encourage students to apply for the same. Pls. see the details of PhD program 2024 January session attached. The general information regarding the admission is available in the prospectus published in our website.

<https://www.sctimst.ac.in/Academic%20and%20Research/Academic/Admissions/resources/prospectus-Jan-2024.pdf>

The call for PhD application is open and is available till Nov. 30, 2023

We are happy to provide an entrance exam centre for PhD in Kashmir, if there are at least 10 applicants from that area.

13/12/23 1:22 PM

Thank you in advance

सधन्यवाद/ Regards
